

USB RECORDER

This USB recorder is very easy to use and connects to your PC through a USB port. It is a popular choice to record conversations either continuously or only when voices and sounds are detected. It has a large storage capacity and can record up to 1000 files. Each file can be time and date stamped so you will know precisely when the recording took place.

There are two recording modes which are easy to adjust. You can choose to:

- Record continuously
- Voice Activation Mode (VAM)

FEATURES

- Rechargeable Battery
- Time/Date stamping
- 25 Days standby time
- Miniature
- MP3 Format
- Records up to 1000 files
